

Hello Drawing with Code Workshoppers!

If you liked what we did in our classes - I strongly encourage you to keep exploring and learning how to code. There are lot's of ways to go about it. Here are a few ideas:

Download processing and keep playing with the examples and try to make something from scratch!

Download processing here: <https://www.processing.org/download/>

Full documentation of what Processing can do: <https://www.processing.org/reference/>

Examples of cool things peoples have made with processing: <http://www.openprocessing.org/>

If you want to try out processing from your chrome book, check this out: <http://semmy.me/ide/>

There are so many ways to learn how to start coding online and it is an awesome thing to teach yourself.

Some fun ways to start coding: <http://code.org/>

This teaches you everything you need to know about making a website: <http://www.w3schools.com/html/default.asp>

Whenever you have an opportunity to learn how to code, take it. It is really useful and there are so many creative and impactful things you can make with it once you know the basics!

Here is a website that goes along with this workshop series: <https://drawingwithcode.wordpress.com/>

Also if you have any questions feel free to email me! I would love to hear from you.
